this up to date book on modern theories of the business cycle fills a gap in the literature by presenting a comprehensive analysis of the major theoretical work before and after 1970 the author focuses on the political and equilibrium theories of the cycle with special attention to the role of government in each of these theories considers evidence supporting these modern theories and their underlying hypotheses and analyzes business cycle modeling and the role of government in the cycle

business cycle theory has been one of the fastest growing fields in modern nonlinear economic dynamics this book presents new mathematical

methods for global analysis which have not previously been available in this easily accessible form in addition it contains a presentation of full analyses of several models left open in the 1950s when the tools then available did not permit more systematic analysis

this book is likely to rank as the standard source on the hoover presidency for years to come

includes sections book reviews and public documents
