in recent decades the mainstream microeconomic and macroeconomic analysis was proven to be insufficient for exploring the dynamic and complex interactions among humans institutions and nature in our real economy on the one side microeconomics is filled with black box models that fail to study the actual contractual relations between firms and markets while on the other side macroeconomics were proven useless because they mistook the beauty of theoretical models for truth thus questions have arisen about using new theoretical and empirical structures that would better describe our economic systems bridging microeconomics and macroeconomics and the effects on economic development and growth is an essential reference source that analyzes the hypotheses that govern the relationships of aggregate structures macroeconomic analysis that may be compatible with the assumptions that govern the behavior of individuals households and firms micro analysis and vice versa in trying to achieve sustainable economic development and growth moreover modern evolutionary growth thinking is used in trying to bridge the inconsistencies between microeconomics and macroeconomics and confront their failures in order to better describe the economic reality while highlighting a broad range of topics including globalization economic systems and the role of institutions this book is aimed toward economic analysts financial advisors policymakers researchers academicians and students

this book analyses the role of crisis or conflicts within socio economic systems and advocates the concept of a conflict free system as the landmark of global economic development
